A cost-effective, proven in-depot parcel tracking solution designed for your business

Order Fulfilment Solution

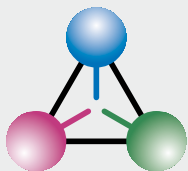

BUSINESS BENEFITS

- A modern approach to managing the flow of parcels through your business.
- A cost-effective use of internet maps to schedule your drivers' manifests.
- The ability to minimise and handle exceptions effectively.
- Control multiple service offerings including 'I need it now' to next, 3 or 5 day deliveries.
- Ensure your customer knows you are handling his parcels effectively.
- Differentiate your service from your competitors.

FEATURES

- An in-depot business solution using wireless communications to track unique items.
- Handles pre-advised or adhoc receipts allowing sort to route/trip.
- Allows you to manage trips automatically against business rules or adjust manually.
- Provides maps for route manipulation, scheduling and planning.
- Creates drivers' manifests for your mobile team.
